PROTECTOR

Smontare la vite originale e montare il Tampono 4Racing con l'apposita vite data in dotazione.

Smontare le viti originali una per volta, montando prima un tampono, poi l'altro per lavorare in sicurezza.

Per montare questo Tampono bisogna forare entrambi i lati delle carene.

Remove the original screws and fit the 4Racing protectors using the supplied screws.

We recommend fitting each unit one at a time and not both together.

It is necessary to make holes on both sides of the fairing so that the protectors can be fitted.

 **ATTENZIONE**

Tutti i prodotti For Racing sono realizzati per uso esclusivamente agonistico ed in circuito chiuso, vietato l'uso su strade pubbliche.

I Tamponi 4Racing si possono avere in 2 varianti.

Tampono normale in colorazione nera (TP)

Tampono Defender Color con anella colorata, in 7 differenti colori (TPC).

The 4Racing fairing guard protectors are available in 2 types:

Fairing Guard protector (TP) - only available in black

Frame slider (TPC) with coloured ring (available in 7 different colours).

 **ATTENTION**

All 4Racing parts are intended for exclusive use on closed circuit race tracks. The use on public highways and roads may be forbidden.
